Silver Gold Buyers tries to take the mystery, the uncertainty and the apprehension out of selling... How do I know what my items are worth? How much will I receive? Will I receive a fair price? How can I compare...?

How? Customers who *know* the **quality** and **quantity** (i.e., the **type**, the **weight** ... in **grams**, **pennyweights**, **troy ounces** and the **number** of coins, or rolls, or sets or face value) of the items they wish to sell, can simply plug in that information and crunch the **estimate bottom line**. If that price is satisfactory -- send the goods!

We go to great lengths to make sure the price is **right... in line... competitive**... and constitutes **fair market value**. But do keep in mind this is an **ESTIMATE**. Precious metal, coin, and collectible prices are *volatile*, often *speculative* -- and not money in the bank... **The Final Settlement Price** is subject to *verification* of the packing slip, a *fair adjustment* for prepaid and assay items, and the *current metal prices* on the day of processing.

Thank you for considering doing business...
